## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-40, drawn to a system for monitoring a structure, classified in class 73, subclass 804.
  - II. Claims 41-47, drawn to a structure with plurality of conductor, classified in generally class 343.
  - III. Claims 48-53, drawn to pipeline, classified in class 406.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of various Groups are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I, which is monitoring of a structure using strain gauge, has nothing to do with pipelines and has separate utility such as providing useful engineering results of the integrity of the structure. Claims of Group II, also do not have the limitations of the claims of Group I for monitoring any structures
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2855

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (703) 308-5248. The examiner can normally be reached on Monday-Friday from 8:00 AM to 5:30 PM.
